

Name _____ Class _____ Date _____

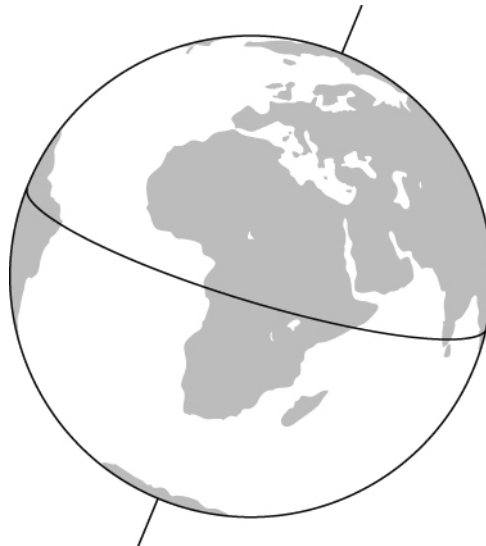

1 Label the diagram using the words in the box.

summer	Sun	winter
--------	-----	--------

2 We have seasons because the Earth's axis is _____.

3 Label the Earth's hemispheres.

4 Circle the correct words in the sentences.

When it is summer in the UK, the (northern / southern) hemisphere is tilted towards the Sun.

When it is winter in the UK, the (northern / southern) hemisphere is tilted away from the Sun.

The Sun feels hotter in the summer because it is (higher / lower) in the sky and its rays are (more / less) concentrated.

Summer days are also warmer than winter days because the Sun is shining for longer and has (more / less) time to warm the air.

I can...

- use the tilt of the Earth's axis to explain the changes in the seasons.
